Universal

Eco Friendly Water Filter Kit

The best solution for better water quality, ice quality and taste

CHARACTERISTICS

The Universal Wpro Eco Friendly water filter Kit reduces chlorine, odours, sediment, dirt and rust **allowing you to enjoy water and ice perfectly filtered**. The housing is **durable and environmentally friendly**. It can be reused for a long time by refilling only the cartridge, which is compostable and can be thrown into the soil as plant fertiliser. This way there will be 40 times less plastic waste over the lifetime of the product than a traditional filter. The high quality coconut carbon allows **efficient filtration** and does not modify the original quality of the water. The Universal WPRO Sustainable Water Filter Kit uses JACO threaded fittings as standard, which are more reliable for making a leak-proof connection, does not cause damage or incisions to the pipeline, and are easier to disconnect and connect than push-on connectors and can be installed in any orientation. Capacity max - 5000 litres. Duration cartridge max - 6 months of continuous use.

CONSUMER BENEFITS

- **Versatility:** compatible with all brands of refrigerator with external filtration
- **High performance:** for better quality and taste of water and ice, high quality coconut carbon for highly efficient filtration
- **Economic benefit:** using a water filter you can save on bottled water and the housing components can be re-used
- **Environmental benefit:** water filters allow you to reduce your impact on environment while saving up to 5kg of plastic going to landfill based on a 10 year life cycle (per user). The cartridge inside can be thrown into the soil as fertiliser for plants
- **Cost Efficiency:** using this filter you can save money buying only the cartridge

THE RECOMMENDATION OF WPRO

Warnings: Do not use where the water is micro biologically unsafe or of unknown quality without adequate disinfection before the unit.

CHARACTERISTICS

Capacity max 5000 litres
Duration cartridge max 6 months of continuous use
Operating temperature: Max. 38°C (100°F)
Working pressure: Max. 0,70 MPa (7 bar)
Flow rate: 2.50 lpm (0,66 gpm)

CERTIFICATIONS

1935:2004 tested in Italy (by Mauro / Ferrilabs) - Will undergo the 2020/1245 additional tests required prior to launch
